AN ANALYSIS OF STUDENT FEEDBACK

A questionnaire was prepared for the 6th Semester students to improve the teaching learning process and to encourage a close relationship between the students and teachers. The following data was compiled based on the students' responses.

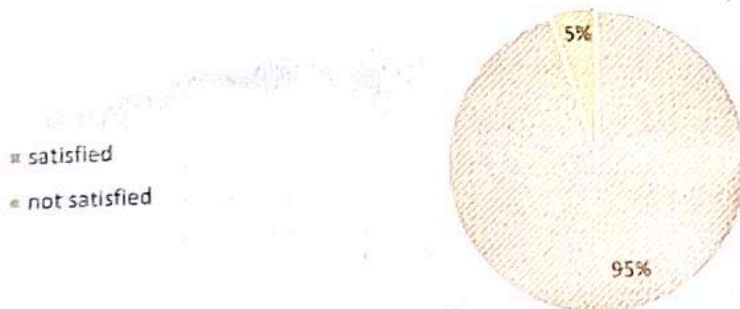

1. The average student attendance in class was 4 times in a week.

ATTENDANCE IN A WEEK

2. With regards to efficacy of the teaching methodology employed in the classroom, 95% of the students express their approval and satisfaction towards the current approach to teaching.

CLASSROOM LEARNING SATISFACTION

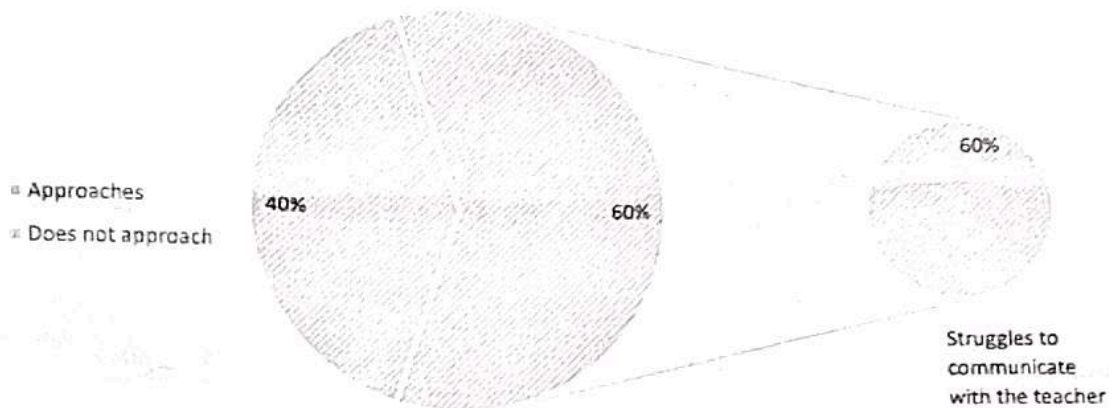

3. 85% of the students demonstrate a clear comprehension and grasp of the concepts and topics taught in the classroom.

CLASSROOM LEARNING

4. All students have expressed their agreement regarding timely completion of the syllabus.
5. A significant percentage of the student body, approximately 60% have exhibited hesitancy towards approaching their teachers for clarification of their doubts. Furthermore, students have reported facing issues in effectively communicating and interacting with the teachers.

SEEKING CLARIFICATION FROM TEACHERS

6. Suggestions given by the students to help improve the learning experience:
- Incorporate more interactive classes.
 - Utilize creative approach to teach according to the preference of the students.
 - Encourage more classroom activities and apply the concepts being taught.
 - Differentiate instruction based on the diverse needs of the students to enhance learning efficiency.
 - Utilize the benefits of the projector technology to supplement classroom learning.
