

## Students Feedback 2020-2021.

### Governance and Leadership

1. I feel the college's leaders show respect for my background and identity.

2. I can easily approach my college authority (Eg: Principal, Vice Principal, HODs) when I need help.

3. Office staff are cordial, helpful, and respectful.

## Curriculum

1. The Curriculum meets the learning needs of the students.

2. The Curriculum provides the students with opportunities to learn and thrive in the 21st century.

3. The college provides opportunity to the students to take part in activities outside the class.

4. The college provides opportunities to students to engage in community service.

#### Online class and IT

1. I am learning about how to be a responsible digital citizen when using technology.

2. I have not faced any issues with the college app Proctur.

3. I am satisfied with the 45 minute online class.

4. I am confident in using information technology (IT) to improve my learning.

5. The College uses Information and Communication Technology (Eg: Smart classroom/LCD projector, etc.) and social media to enhance students' learning.

#### Teaching and Learning

1. Teachers are competent, committed and have sufficient skills to teach the curriculum.

2. My teachers create a positive online environment that helps me learn.

3. My teachers are accessible and effectively answers questions about course content, assignments, and procedures.

#### Students' Well-being (Facilities)

1. My college supports me socially and emotionally.

2. The college has a supportive environment for students' well-being.

3. The college premises are clean and well-maintained.

4. Suitable toilet and running water facilities are accessible and give appropriate privacy.

5. The college provides safe drinking water.

6. The college has good canteen facilities.

7. The college has adequate library facilities.

8. The college has enough office counters.

9. I am satisfied with the effectiveness of the college's career guidance and mentoring processes.

253 responses

10. College addresses students' grievances and issues immediately.

253 responses

### College Hostel

1. The hostel accommodation provided is appropriately cleaned and maintained.

86 responses

2. Suitable toilet and washing facilities are accessible and give appropriate privacy.

3. The hostel accommodation provided is organised appropriately for private study.

4. I am satisfied with the quality of food and drink provided in my residence.

## **Some comments and suggestions from students**

- Hearing out the opinions of students positively
- Our college marking system is too low and bad as compared to other colleges. Therefore, my suggestion for the college is to improve in marking system. Thank you.
- I prefer offline classes so plez see to that matter
- Good
- Impressive time management skills
- I suggest to take offline classes if possible
- Excellent
- We need good drinking water facilities
- Basing on the situation it will be better with online classes. Also those questions were quite good ☐
- The college should give feedback to the students in a timely manner and be sensitive to the individual needs of the students.
- Toilets are too Bad ☐, The College also need to maintain a clean environment, The college also need to provide fresh drinking water in every Class ,If possible .. May be the students also need a good and developed College Canteen.
- Personally the college is not that well maintained , we can't neglect and turn a blind eyes on the infrastructure,so also on all the other things too ,not all but there are some workers being rude ,ya they might be coz of many students and all those problems from many students but they should give proper guidance and information too as it's their duty,or else many would think that it's a government run institution and they're gonna be paid even if they don't do their work or being bossy or rude. Also really appreciate and got inspired from some lectures for giving their best , going that extra miles and understanding the grievances of the students.
- There's quite many unfulfilled and unsatisfactory things that should have been done and looked upon with immediate attention and response.
- The college authority have been functioning well and all the activities
- Washrooms always stinks with lack of proper water during offline classes, only one counter for submission or collection of documents is very inconvenient it becomes crowded and we can't maintain SOP ,it's hard to catch up with online classes because lessons are taken so fast you miss one class and a whole portion is unknown, it would be good if classes could've started early because with late resumption of classes lecturers too have to rush their lessons and in turn we learn nothing. PS.- just waiting for offline classes to resume.
- Give clean and safe water to drink -the authority should look into the matters of cleanliness and hygiene in and around the college. (Highly recommended) -keep the construction workers after class or office timing because it is so annoying and disturbing, especially for the classrooms near the work place.
- Hoping that this surely will not only keep it for the sake of keeping record but will be show in action the needs of the students.
- Bus services for students is not good. The college need more buses and moreover every students are made mandatory to pay bus fee during admission
- Kohima College Kohima is the best Government college in my opinion and I'm very thankful for being a member of this prestigious college. From most respected Madam our Principal, lectures and staffs to the most humble non teaching staff are very kind and generous towards the students or anybody else. The college has almost everything for enhancing the best quality of the students. We thank you Kohima College Kohima for being the greatest source for building each and every one of us(students) in the perfect manner in which we all could bring out the best of ourselves in life. Thank you .
- Well, with a briefly words I want offline classes to proceed in the earliest possible
- Need offline class
- There's limited college hostel seat,so I want the college authority to build more building for hostel.
- Better start with our normal class ( offline class)... I could not attend even a single class...I hope and believe that through this feedback we will back to our normal class ☐☐
- Our college has four counter but hardly two counters have been use. So my request is that during issuing of forms or marksheets, more counter should be use so that it saves time and space to have social distance.
- Problem with online classes, make it offline for better understanding and learning
- Physical class shoud be back with certain regulations
- Stress more on discipline
- Nothing
- What if the college allow 5th semester to have offline classes... ? Well, online classes is good but sometimes we can't concentrate what is going on, sometimes Network isn't good enough to take classes. And yaa, since this year is our last year we want to have offline classes to learn more things, more knowledge coz see taking online classes doesn't make

us to achieve our goal. As we said, Just going with the flow.... 1st and 3rd semester students can have online classes but please allow 5th semester students to have offline classes. Hope our college can handle that... Coz we have enough classroom to make adjustments. That's all. Thank you.

- No other feedback needed yes it provide good drinking water facilities but only during exam time. Yes we also pass through online class but marks are not up to our expectation and internal marks are very low
- Eagerly waiting for the offline class. God bless Kohima college Kohima
- Treat the students as nice as how other colleges does if the students are expected to behave as good as other colleges.. thank you
- Everything is fine till now
- Through online we not able to learn up to the expected level. I support quick resumption of offline classes
- I don't know much because I wen college only for few months but still so far it is good and i prefer offline class
- Students toilet needs to be hygienic.
- It's hard for both students and teacher but this is the best we can do now. It's pretty good.
- It is helpful sometime to conduct this kind of survey.
- I think it will look more beautiful than what we are, if the classroom or college are well painted. Thank you.
- So far everything is well n good.
- To give the necessities to students at earliest like the uniform ,unlike the 3rd semester batch. Response from the authority is highly needed (helpline). Understand the situation of the students. Those are the few suggestions from me . Other than I love the college , it is well maintained as needed.
- I wish the college authority would resume offline class from next month with strong sets of SOPS to follow
- I hope the college will continue with the online classes as me and most of my friends are in village and we don't have any place to stay in kohima since we moved out from our previous rent house as per the situation and we couldn't afford to pay the rent, and during this pandemic its really hard for us to find and afford a new rent place

....

- Best
- No comments
- Nothing else
- Restrooms.
- So far so good
- Offline classes the better for each and every one
- Boys urinal spot need to upgrade like water n proper maintanence lots of tobacco covers n spits around corners.... ..suggesting ....install waiting/resting bench outside r unside cuz we hve to wait for class timings waiting outside n seat in stone some standing waiting an hour n more ..... We are lagging behind in MIL Tenyedia net is unstable in lecture's spot ..... Lots of Activities like assignments/surveys n writings should be there.... online college life is boring! Without activities.
- After all it's good
- Everything is absolutely great till now. And I believe it will keep on going great. well everybody is facing the consequences of the Lockdown(Covid 19), I personally think that many students are losing lots of opportunities in every field. Moreover looking at the present scenario it seems that Leadership responsibilities is lacking due to the uninvited situation we are in right now . This is my personal opinion as I have been in college for more than 2years and when everything was normal(before covid-19 lockdown) Apart from that Everything is well functioning with whatever extend we could.(Both students as well as college authorities). Hoping for the Normal situation and Normal state for all. LONG LIVE KOHIMA COLLEGE KOHIMA.
- \* For online classes the proctr must be well developed.
- \* No comments.
- \* Maintain lightings in the dark areas and reinstall/or repair the broken/dismantled furniture and other different facilities
- \* To give information and notice as early as possible
- \* I wish the college can provide more buses for students and
- \* More counter or staff because whenever a time come for us to take marksheets or do our addmission we use to have a long line like a train take us hours to complete our work.
- \* Thank you
- \* The most amazing and thrilling part of this college is, seeking and examining the students opinion through this kind of feedback about college on the various matter .... Hope the feedback of students will bring positive results
- \* It will be better if we continue with our offline class so that we can learn at least something
- \* Helpful
- \* It will be very good if we start offline class as soon as possible..
- \* None.

- Only request is to start offline class...
- More toilets, and sitting sheds
- The college premises and the toilet is not upto that expectation So it will be much better to look into that matters
- The suggestions is that every students should be taken into consideration and have concern according to the situation by the college authority. I feel like there should be consideration while committing error because all the students does not have the same adequate resources and facilities due to the poor economic background.i think we should promote socialist ideologies by helping every needy and poor students and having consideration most importantly. Our institution is the place where we sharpen ourselves and can be a turning point of positive change which everyone wishes the systems to be ..thank you
- Some of my constructive feedback and suggestions are- 1) seperate building for secondary and college. 2) clean sorrounding. 3)more curricular activities.
- Resumption of offline class for better learning
- I suggest college to reopen offline classes since our education are lacking in online classes we faced a lot of problem in online literally ...Physically n practically contact with teachers is much helpful n understanding than in online interaction.
- If i talk about any constructive feedback abt our college then i Would probably say that our Counter system is not that suitable ,so what if we create more counter rooms for proper and fairness in Accessing with the students issues ,we have to line up and wait for hours as we all see that issues whenever there is any Issurance of forms etc.
- Need improvement in classroom ... because we're in digital world
- Nope
- I sincerely hope the condition of the women's toilet improves and that we continuously get running water since we're paying for it and also because it is a must.
- I would loved it if they could provide us some activities to help us understand the concept better
- It would be good if the college focuses more on whether the students are learning rather than rushing to complete the syllabus. And also check on the college hostel once a month.
- Physical classes must start, if there is any chances.
- Provide sufficient water supply in man's washroom and good network college WiFi.
- Sometimes water used to runs out for days or weeks, so Availability of running water supply should be there all the time to used in the toilet or cleaning our hand so I urged the authority to please look forward into this situation.
- The college should provide better running water and toilet and there must be sufficient toilets for the students. Better and hygienic canteens are required for the students.
- If possible ,i guess it will be best for everyone if offline classes starts
- My suggestion is to have offline classes sooner rather than online because it has big difference according to my experiences and observation as a student.
- The college should go for offline classes rather than online classes so that both teaching and learning becomes easier and comfortable .
- About the college uniform it would be very nice if we have a mandatory full dress uniform
- I do always appreciate the lectures who are well being sincere to their work and gives their Best to teach and mould their students.
- I do always appreciate our staffs who are well being sincere to their work and gives their best to teach and support their students.
- physical class is needed

## **Analysis of Student's Feedback 2020-21**

1. The majority of students are satisfied with Governance and Leadership. However, the students commented on special mention of the office staff to be more cordial and polite while performing their duties. The students also made comments on insufficient counters especially during submission and collection of documents, which becomes very inconvenient for the big crowd to maintain SOPs. To avoid rush, misunderstanding, and inconveniences during such times, the students request the college authority to look into this matter.
2. On Curriculum, the students expressed the need to offer more courses based on economic and sustainable activities. More extracurricular activities are to be conducted to encourage students' participation and build their leadership skills.
3. Almost all the students suggested going offline as they felt that online classes are not helping them much. Frequent interruptions in network connectivity, being the major problem, they feel that physical classes are easier and more comfortable for both teaching and learning.
4. Quite a good number of students suggested that Proctur App should be more user-friendly and easy to access.
5. A student also commented on keeping away the construction works during class hours (offline) as it is disturbing.
6. While appreciating the teachers for giving their best and going the extra mile, the students want the teachers to be more approachable and understand those students with genuine reasons when they go through tough times and are unable to do their work on time. The students also suggested that teachers need to share their slides, speak more slowly during online classes, have more interactive classes, and be more generous in the marking system.
7. On students' well-being and facilities, the students strongly proposed for more toilets (both boys and girls) with running water, restroom and to maintain cleanliness and hygiene in and around the campus. To provide safe drinking water, good canteen, allow the students to use the reading room freely even in the absence of the Librarian and provide more books in Philosophy and Tenyidie sections.
