

# Students Satisfaction Survey 2021

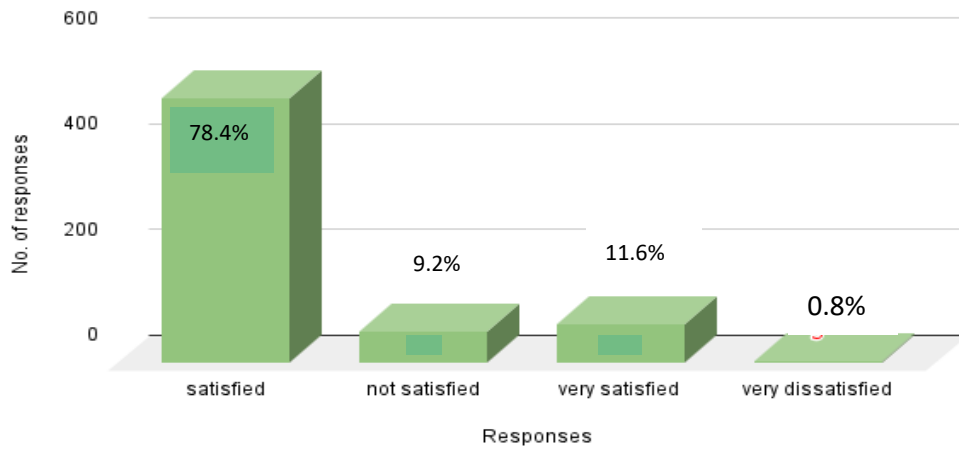

### Participation in sports activities and availability of sports facilities

### The overall opinion on the College

## **Report on Students Satisfaction Survey 2021**

An online survey was conducted on student satisfaction of the college based on eleven criteria from 28<sup>th</sup> April to 8<sup>th</sup> May 2021. Out of a total of 1325 students, 642 students submitted their responses. Eleven close ended questions were asked on the following areas:

1. The quality of knowledge imparted by the teachers
2. Teaching skills and tools applied by the teachers
3. The infrastructure of the college
4. The college library resources and facilities
5. The relevance of the curriculum for their future
6. Safety in terms of the learning environment
7. Safety of girls in the college
8. Addressing the grievances of the students
9. The extra-curricular activities
10. Participation of students in sports activities and availability of sports facilities
11. The overall opinion of the college.

On an average of all the criteria asked, 75% of the students responds have shown that they are satisfied with the college. Among these different areas, the responds of the students in terms of their satisfaction index on the quality of knowledge imparted by the teachers is 77.1%, and on the teaching skills and tools applied by the teachers is 76.7%, thus implying that the teaching faculty is delivering what is expected of them to impart quality education. But ,sport activities and availability of sports activities have been the least with 54.2% satisfied with the college. However, it is to be noted that all sports activities has been stopped due to the unprecedented time of pandemic affecting the offline activities of the college where no sports gatherings as well were allowed during the three months of reopening of college as the SOPs had to be observed to maintain the safety of the students and more importance was laid on academic activities. Similarly, the criteria on extra-curricular activities also received 58.9% satisfactory responds and this has also been due to the pandemic putting a halt to most of the extra-curricular activities. The overall opinion of the students fared the best in terms of the data collected as out of 639 response received on it, 78.4% of students were satisfied and 11.6% were very satisfied thus projecting that the college is performing well as an educational institution.
